

Bring Us Near

If you could spend the night beneath
A maritime moon filled sky
Hear Nova Scotia's ocean roar
O'er a lonely seagull's cry
Light a fire to keep you warm
When the autumn nights are clear
You would understand me better
That would bring us near

If you could feel that south wind blow
Cross your back on a red clay shore
Go drifting back like a mariner old
With his thoughts so long before
Make a promise that you'd never change
From the man who was standing there
You would understand me better
That would bring us near

And if you ever feel that peace of mind
It will not let you be
I wish that I could take you there
Oh, the ocean you and me
You would feel that whole earth breathe
As the feeling stole your fear
You would understand me better
That would bring us near
