

Walking

Put your boots on
Lace them up real tight
A pair of gloves
For two old loves
Tonight
It's ten below
The fire is burning bright
But we'll go walking
Walking out tonight

The stars are out tonight
And the planets are in flight
While Venus chases up the moon
And shines almost as bright
The stars are out tonight
And the planets are in flight
And we'll go walking
Walking out of sight

The snow is crispy
Fields are misty too
If I could dance
I'd do the old soft-shoe
I'd spin you 'round and
Twirl you like a top
Then we'd go dancing
Life would never stop

The stars are out tonight
And the planets are in flight
While Venus chases up the moon
And shines almost as bright
The stars are out tonight
And the planets are in flight
And we'll go walking
Walking out of sight

That old, Grand Canyon
Can't be grand as this
Yeah, I could roam
But then this place I'd miss
I'd miss the backyard fence
And shadows cast
I'd miss not being here
Around my past

Where the stars are out tonight
And the planets are in flight
And Venus chases up the moon
And shines almost as bright
The stars are out tonight
And the planets are in flight
And we'll go walking
Walking out of sight

Put your boots on
Lace them up real tight
A pair of gloves
For two old loves
Tonight
It's ten below
The fire is burning bright
But we'll go walking
Walking out tonight
